Beautify your home with stained glass windows today!

[Company] is America's first choice for quality, prefabricated stained glass windows, beveled glass, gifts, and lamps. Whether you need one stained glass window for a special project, custom-made stained glass inserts for your cabinets, or multiple stained glass windows for your new home, we can help.

We also build custom stained glass windows and beveled glass for the residential and commercial markets. Our stained glass windows are a perfect way to beautify any window.

Most people seek stained glass for its beauty. Stained glass windows in the home have other useful purposes, too!

- Diminish intense sun rays from entering your home, which protects your furniture, carpets, and precious woods from long-term sun damage.
- Give you just the right amount of sunlight and all the privacy you would expect from drapes.
- Change an unpleasant view of your neighbor's house into a vision of art and color.

Our beautiful stained glass windows make a perfect addition to any decor. We can model your window to match the current decor in your home or make you a pattern from scratch. All of our stained glass windows are guaranteed to have a dramatic effect on every room in your home.

In each situation we genuinely try to help each client step by step to the best of our ability.

Each piece we offer is made from scratch with all 100% hand cut and hand crafted with the finest quality American made "Spectrum Glass." Due to the intricate process it takes to create each finished piece, this is an art that can never be machine duplicated. From cutting the glass from a large sheet, to copper foiling the edges, and finally to soldering each piece together by hand, this is an art that is centuries old and will never be compromised by modern technology.

Most of these designs are our own original stained glass window patterns, created by our freehand artist, but we also make custom windows. E-mail us today for a free quote. If you need any help or have any questions, feel free to contact us.

Original version of website text.

America's first choice for quality prefabricated stained glass windows, beveled glass , gifts and lamps. Our services also extend in the construction of custom stained glass windows & beveled glass for the residential & commercial markets.

Whether you need one stained glass window for a certain project, custom made stained glass inserts for your cabinets or multiple stained glass windows for your new home, we can help with most any job and size. If we cannot help you, we will most likely be able to point you in the right direction of someone who can. In each situation we genuinely try to help each client step by step to the best of our ability.

Why not beautify your home with stained glass windows today! Traditionally most people who seek stained glass for it's beauty. However, stained glass windows in the home have many other useful purposes. It can diminish the intense sun rays from entering your home which will in turn protect your furniture, carpet and precious woods from long term sun damage.

Our stained glass windows are a perfect solution for any window in your home. Every stained glass window will give you just the right amount of sunlight and all the privacy you would expect from drapes.

It can also turn an unpleasant view of your neighbors house with one of our beautiful stained glass windows which will go perfect with any decor. We can model your window to match the current decor in your home or make you a pattern from scratch. All of our stained glass windows are guaranteed to have a dramatic effect on every room in your home.

Each piece we offer is made from scratch with all 100% hand cut and hand crafted with the finest quality American made "Spectrum Glass" . This is an art that can never be machine duplicated, this is due to the intricate process it takes to create each finished piece we offer. From cutting the glass from a large sheet, copper foiling the edges and finally soldering each piece together by hand is an art that is centuries old and will never be compromised by modern technology.

In fact most of these designs are our own original stained glass window patterns that our freehand artist has created. Once again, we also make custom windows, so email us today for a free quote. If you need any help or have any questions while browsing our site please let us know.
